AUGUST 2026

Dear Sir,

I am writing to express my strong interest in the Full Stack Developer position. With over 4 years of hands-on software engineering experience, I specialize in building end-to-end, high-performance web applications using Laravel, React, Next.js, Inertia.js, and Node.js alongside robust backend databases like MySQL. My focus is on writing clean, scalable code and delivering seamless, intuitive user experiences from concept to production.

Throughout my career, I have engineered complex full-stack web platforms, e-commerce applications, and custom software systems. My technical experience bridges backend architecture with modern frontend execution. On the backend, I design optimized database schemas, build RESTful APIs, implement secure authentication/authorization protocols, and integrate third-party payment gateways and services. On the frontend, I craft pixel-perfect, mobile-responsive interfaces using React, TypeScript, Tailwind CSS, and Bootstrap. Leveraging Inertia.js, I streamline full-stack SPA development by eliminating unnecessary client-side API overhead, while utilizing Next.js (SSR) to maximize loading speed, accessibility, and Core Web Vitals compliance.

I thrive in Agile team environments, using Git workflows to collaborate efficiently with UI/UX designers, backend engineers, and product managers. I take pride in taking full ownership of projects, understanding the business context behind every task, and consistently delivering maintainable, high-quality code on deadline. I am eager to bring my full-stack development skills and problem-solving mindset.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my engineering background aligns with your team's goals.

Sincerely,
Julfiker Ali

JULFIKER ALI

Full Stack Developer

ABOUT ME

I am a Full-Stack Web Developer specializing in Laravel, React, Next.js, and WordPress. I build robust, high-performance web applications and premium, ThemeForest-standard WordPress themes. My focus is on writing clean code and creating modern, minimal UIs that offer a seamless user experience. Whether you need dynamic layout management, pixel-perfect Bootstrap styling, or top-tier speed optimization, I deliver scalable solutions tailored to your goals. Let's build something exceptional!

EDUCATION

EXPERIENCE

Software Engineer

2023 - 2025

Luminous Labs | Mirpur DOHS, Dhaka

- As a Software Engineer at Luminous Labs, I designed, developed, and optimized high-performance, secure full-stack web applications utilizing Laravel and React/Next.js. I implemented modern single-page application (SPA) architectures with Inertia.js to streamline backend-frontend integration and significantly accelerate development workflows. To ensure top-tier user experiences, I enhanced loading speeds, SEO rankings, and database efficiency by leveraging Next.js Server-Side Rendering (SSR) and optimized query structures. Additionally, I built custom WordPress themes, plugins, and custom fields tailored to scalable client requirements while maintaining clean, reusable code standards using modern JavaScript (ES6+). Working closely with cross-functional teams in an Agile/Scrum environment, I consistently delivered robust, high-quality software solutions on schedule.

WordPress Theme Developer

2021- Present

Themeforest

- As a WordPress Developer on ThemeForest, I designed, developed, and published multiple premium blogging themes adhering strictly to Envato's elite coding, architecture, and security standards. I specialized in building highly customizable, flexible layouts using Elementor Page Builder by creating custom widgets and extensions that provided end-users with an intuitive drag-and-drop editing experience. To support e-commerce functionality, I implemented full WooCommerce compatibility, complete with specialized shop pages, dynamic product grids, and optimized checkout flows. My focus remained on crafting modern, minimal UI/UX interfaces with clean code structures, compressed assets, and extensive custom options panels—ensuring responsive cross-browser performance, exceptional user control, and top-tier Google PageSpeed scores.

EXPERIENCE

WordPress Developer

2020 – 2023

Fiverr

- As a freelance WordPress Developer on Fiverr, I successfully designed, built, and launched diverse, fully customized websites—ranging from portfolios and blogs to complex WooCommerce e-commerce stores—for international clients. I specialized in advanced layout customizations, bug diagnostics, and resolving critical platform issues such as plugin conflicts, layout alignment flaws, and performance bottlenecks. By configuring robust caching, compressing assets, and optimizing databases, I consistently improved site loading speeds to meet modern Core Web Vitals standards. Managing the entire project lifecycle independently, I provided strategic technical consultation, delivered pixel-perfect responsive layouts on strict deadlines, and maintained long-term post-launch support to ensure total client satisfaction.

SKILLS

HTML, CSS, Next.js, Bootstrap, PHP, Node.js, Git, Github, React Native, jQuery, Unit testing, JavaScript, Website maintenance, Laravel, JSON, React, TypeScript, SEO, Web accessibility, WordPress

PROJECTS

TextCRM | Omnichannel Customer Communication Platform

React, Inertia.js, Laravel, MySQL

<https://textcrm.chat>

- TextCRM is a SaaS-based CRM application designed to streamline customer communication through WhatsApp. I contributed to this project as a frontend developer, focusing on building dynamic, responsive interfaces using React and Tailwind CSS. The application features a visual chatbot flow builder, WhatsApp messaging system, product catalog management, and contact tracking—enhancing user engagement and productivity. Integrated with Inertia.js for seamless Laravel backend communication, this CRM delivers a smooth SPA experience. Upcoming features include support for Facebook Messenger and Telegram for robust multi-channel communication.

KEOS Wallet | Passkit Portal for Apple Wallet

React, Node.js

<https://julfikerali.com/project/keos-wallet>

- This is a passkit portal which integrates seamlessly with Apple Wallet, allowing you to create and manage digital passes that users can store on their iPhones. Apple Wallet is a digital wallet app that securely stores various types of passes, including boarding passes, tickets, loyalty cards, and payment cards. With Passkit, you can easily generate and distribute these digital passes, which users can add to their Apple Wallet for convenient access.

Jersey Hunt BD | Premium Jersey Store in Bangladesh

React, Inertia.js, Laravel, MySQL

<https://jerseyhuntbd.com>

- A modern, fully responsive e-commerce web application built for sports merchandise and jersey retail, featuring user authentication, wishlist functionality, dynamic shopping cart management, and smooth UI transitions.

TextCRM | WordPress Landing Page

WordPress, Gutenberg

<https://julfikerali.com/project/textcrm-landing-page>

- TextCRM landing page is a sleek and modern landing page built to showcase a CRM application. I developed this site from a Figma design and implemented it into a fully responsive WordPress website using Full Site Editing (FSE) and the Gutenberg block editor. The project focused on performance, clean structure, and user experience. I crafted reusable Gutenberg blocks and custom layouts to ensure easy content management and future scalability. The final result was a fast-loading, SEO-friendly landing page tailored to highlight the key features of the CRM tool.

○ PaidToday | Get Paid Today

WordPress, Elementor

<https://paidtoday.ai>

- Paid Today (Factiv) is a modern B2B fintech platform designed to streamline invoice funding, accelerate cash flow, and help small-to-medium businesses build reliable business credit scores. The platform enables enterprises to secure faster receivables, manage customer payment reporting, and access transparent credit insights as an efficient alternative to traditional credit bureaus. To deliver this experience, I engineered the entire website from scratch using WordPress and Elementor by building fully custom, lightweight PHP widgets for every UI section rather than relying on heavy third-party plugins. I focused on crafting a clean, modern, and pixel-perfect user interface tailored to financial services, incorporating complex interactive elements such as dynamic pricing structures, feature breakdown panels, workflow walkthroughs, and side-by-side comparison matrices. Through modular CSS/JavaScript architecture, asset compression, and clean PHP coding, I optimized asset loading to ensure fast performance, seamless cross-device responsiveness, and full compliance with Core Web Vitals standards.

○ Fortune Wheel | Customer Reward Spinner

React, Node.js

<https://julfikerali.com/project/keos-spin-customer-reward-spinner>

- Fortune Wheel is an interactive web-based spinner application designed to enhance customer engagement through a gamified reward system. Built with React and styled using Tailwind CSS, this project allows customers to scan a barcode to check their available vouchers and remaining spins. The spinner includes randomized options such as “10% Discount”, “Free Gift”, “No Luck”, and more. The app ensures a smooth, responsive user experience across all devices and helps businesses drive customer retention through interactive rewards.

○ Click & Shop | Modern eCommerce Website Template

HTML, CSS, Bootstrap, jQuery

<https://julfikerali.com/project/click-shop-modern-ecommerce-website-template>

- Click & Shop is a clean, responsive, and modern eCommerce website template designed for online retail businesses. The layout was meticulously crafted from a Figma design and brought to life using HTML, CSS, Bootstrap, and jQuery. This template includes all essential eCommerce components such as product listings, filtering options, shopping cart UI, and a sleek checkout interface. The design ensures full responsiveness across all devices and offers an intuitive user experience for online shoppers.

○ Ethrik | Creative & NFT Affiliate WordPress Theme

HTML, CSS, Bootstrap, WordPress, Themeforest

<https://promising-themes.com/ethrikwp>

- Ethrik is a modern WordPress theme exclusively designed for NFT, NFT Portfolios, Web3, digital art and many more purposes. It's trendy, fully responsive and easy to customize. Modern UI design is integrated with this theme and it stands for latest user experience. Ethrik is a dedicated WordPress Theme for NFTs shops and NFT assets stores, crypto art markets and for digital assets bidding websites.

○ FinMag | Modern Magazine WordPress Theme

HTML, CSS, Bootstrap, WordPress, Themeforest

<https://promising-themes.com/finmag>

- Finmag is a trendy & attractive Blog, Online News, and Magazine WordPress Theme. It is perfect for any News/Magazine or any category like Blogs, Sports, Fashion, Tech, Soccer, Politics, Videos, Travel, Style, Beauty, Health, Yoga Magazine sites, etc. It includes everything you need for a News/Magazine.

○ Kalliope | Modern Blog WordPress Theme

HTML, CSS, Bootstrap, WordPress, Themeforest

<https://promising-themes.com/kalliope>

- Kalliope is a trendy & attractive Blog Magazine WordPress Theme. It is perfect for any kind of creative magazine, news, blog websites, online magazine site, personal blog, or any category like Lifestyle, Fashion, Tech, Soccer, Fashion, Politics, Videos, Travel, Style, Beauty, Health, Yoga sites, etc. It includes everything you needed for a News/Magazine.

- UBA Fashion | E-commerce Platform

HTML, CSS, Bootstrap, Laravel, MySQL

https://ubafasion.com.bd

- UBA Fashion is a sophisticated e-commerce website built using Laravel, a powerful PHP framework renowned for its elegance and robustness. Laravel's features, such as its MVC architecture, intuitive routing, and built-in authentication, are essential for delivering a seamless shopping experience. The framework's extensive ecosystem of tools and libraries, including Eloquent ORM for efficient database management and Blade templating engine for flexible UI design, allows for a scalable and maintainable codebase. With Laravel at its core, UBA Fashion benefits from enhanced security, performance, and customizability, ensuring a reliable and dynamic platform for users to explore and purchase fashion products.
- Droptienda | Dropshipping and E-commerce Platoform

HTML, CSS, Bootstrap, PHP

https://julfikerali.com/project/droptienda

- Droptienda is a powerful CMS designed specifically for dropshipping and e-commerce. It provides an all-in-one platform that simplifies the management of online stores, offering seamless integration with various dropshipping suppliers and e-commerce tools. With Droptienda, you can effortlessly set up and customize your online store, manage product inventories, process orders, and track sales. The platform's intuitive interface and robust features make it ideal for entrepreneurs looking to streamline their e-commerce operations and scale their business efficiently.
- Kristo | Modern Magazine WordPress Theme

HTML, CSS, Bootstrap, WordPress, Themeforest

https://julfikerali.com/project/kristo-modern-magazine-wordpress-theme

- Click & Shop is a clean, responsive, and modern eCommerce website template designed for online retail businesses. The layout was meticulously crafted from a Figma design and brought to life using HTML, CSS, Bootstrap, and jQuery. This template includes all essential eCommerce components such as product listings, filtering options, shopping cart UI, and a sleek checkout interface. The design ensures full responsiveness across all devices and offers an intuitive user experience for online shoppers.
- Aappify | Multi Vendor E-commerce Mobile Template

React, Mantine

https://julfikerali.com/aappify

- Aappify is a modern, responsive multi-vendor e-commerce mobile web application template engineered using React and the Mantine UI framework. Designed to offer a native app-like user experience on mobile browsers, it provides a complete frontend solution for complex marketplace platforms with multiple sellers and product categories. I built the entire mobile application UI from scratch, crafting clean, modular components for essential e-commerce flows including dynamic product listings, vendor storefronts, interactive shopping carts, user authentication, wishlists, and checkout screens. By leveraging React's component-driven architecture alongside Mantine's robust design system, I ensured highly customizable layouts, seamless state management, crisp typography, and optimal touch-responsive performance across all mobile viewports.
